

Interim Report Criteria

1. Introduction

- Domain description
- Current system and limitations
- Goal & objectives
- Assumptions, if any

2. Feasibility Study (You can refine the feasibility study you did for the proposal if needed)

3. Requirements

- Stakeholders / Actors
- Functional and Non-Requirements
- In-scope and out-scope
- Constraints and limitations, if any

4. Proposed System's Architecture

- Components and their functionalities
- Component interactions

5. System Design Diagrams

- Use case diagrams
- Class diagrams
- ER Diagram
- Activity diagrams

6. Current Progress

- System development progress concerning the system requirements.
- What percentage of the system do you estimate is completed now?
- What are the remaining tasks / work?
- Each Member's contribution – who is responsible for which area/section/component.
